A. FINDINGS ON THE DAY OF THE SURVEY (general description of the appearance and constitution, size)

A very large (66cm), strong, well pigmented, masculine, black and gold dog of very good type and proportions. Very good head with dark eyes, dark mask and very good expression; good length of neck, high withers, firm straight back, slightly short croup of good lay; good forequarter angulation where the upper arm could be slightly better laid, very good hindquarter angulation, very good topline, stands very nearly correct in front. Moves with hocks just slightly close, correct coming with good sequence of steps. Shows a very good ground covering gait with pleasing balance, powerful drive, the reach could be just slightly freer, the back remains totally firm. Alert and self assured; he stands firm to the gun.

B PARTICULAR VIRTUES & FAULTS (in addition to findings in A)

A robust, energetic dog presented in very good condition; shows much strength. Very good hip/elbow status. Slightly untidy tail set. He stands on the upper limit of size, despite that, he is firm and dry. Correct coat.

C. ADVICE FOR THE SELECTION OF A BREEDING PARTNER (Recommendations & Warnings)

An outcross; ideally only suitable for medium sized bitches who come from lines carrying medium size, and those who would benefit from a male with strength of constitution.
