A. FINDINGS ON THE DAY OF THE SURVEY (general description of the appearance and constitution, size)

Black and gold, (62.5cm). Ideal medium size, medium strong, firm and dry, masculine and expressive, well formed head, good eye colour, he embodies a very good type, normal length and angle of neck, high withers. Firm back, good mould of the croup which is slightly short, long upper arm that could ideally be a fraction better angled, very good hindquarter angulation, broad thighs, stands correct in front, steps correct coming and going, elbows yet to fully close, he demonstrates a very balanced very good ground covering movement with very good drive and good reach via a firm back. Calm and self-assured and stands firm to the gun.

B PARTICULAR VIRTUES & FAULTS (in addition to findings in A)

He presents an unexaggerated picture in stance and has a pleasing general construction, is well coloured and has strong pigmentation, very good proportions from wither to brisket and brisket to ground, very good length of bones, normal fore and underchest development and he maintains a very good wither retention at both a walk and gaiting with very good overall firmness over his topline. He has a good hip and very good elbow status and is DM normal.

C. ADVICE FOR THE SELECTION OF A BREEDING PARTNER (Recommendations & Warnings)

He comes from sound producing lines on both sides of his pedigree and is recognisably true to his sire in type. Particularly useful to help improve height, proportions and general overall firmness. Partners should have very good overall strength and substance. Highly recommended for breeding.
