A. FINDINGS ON THE DAY OF THE SURVEY (general description of the appearance and constitution, size)

Black and gold, (66cm), very large, above medium strong, substantial male who is very typey, very well coloured, firm and dry, masculine and very expressive, good eye colour, well set neck of very good length, high withers, firm straight back, croup of a good lay just slightly short, very good length of upper arm, ideally could be slightly better angled, very good hindquarter angulation with broad well-muscled thighs, very good fore and under chest development, stands correct, slightly wide going, correct coming, elbows yet to fully close, he displays a very far reaching ground covering movement with much strength and dynamism, powerful drive and maintains very good wither retention. Stands firm to the gun. HE IS CLASSIFIED CLASS 11

B PARTICULAR VIRTUES & FAULTS (in addition to findings in A)

A younger male full of vitality who has a natural desire to run and perform and in addition he possesses many attributes of his youth, particularly strongly pigmented, he impresses with his dryness and firmness, with very good overall proportions. He is full of spirit and presented in very good condition, however he stands at maximum height and his pasterns need to be a little firmer but overall a very harmonious picture. (would have been class 1 but for height). He has a very good hip and elbow status and is a DM carrier.

C. ADVICE FOR THE SELECTION OF A BREEDING PARTNER (Recommendations & Warnings)

from a very good litter, with very good uniformity. On the basis of his ancestry, he appears suitable to improve colour and pigmentation, to help improve foreleg length, topline, wither placement and in particular vitality and enthusiasm but partners need to be of medium to above medium in height with good strength of nerves.
