A. FINDINGS ON THE DAY OF THE SURVEY (general description of the appearance and constitution, size)

Black and gold (60.5 cm), very large, above medium strong, she is very feminine and expressive with complimentary dark eye, good length and angle of neck, normal withers, firm straight back, her croup should be a little longer and better positioned, her upper arm is of good length but should be more correctly angled, very good hindquarter angulation, very good fore and underchest development, stands nearly correct, correct coming, narrow going, her hocks should be firmer and her elbows are yet to fully close, she displays a far reaching movement, is well balanced with very good drive however her reach should be freer. Stands sufficiently firm to the gun.

B PARTICULAR VIRTUES & FAULTS (in addition to findings in A)

A particularly well coloured and pigmented bitch with a well maintained centre of balance with good length of foreleg, very firm and dry but her forequarter and croup line should be more correct. She was in change of coat, has a very good elbow status and is DM clear.

C. ADVICE FOR THE SELECTION OF A BREEDING PARTNER (Recommendations & Warnings)

On the basis of her family heritage she carries sound producing lines on both sides. In selecting a partner make sure they have correct forequarter angulations and croup line with a good hip status. Recommend Wulkano-Uno von Schnitzteam (Imp Hungry) with further consideration to Xander vom Grabfeldgau (Imp Ger) and Freemont Watson (Imp Aust) in New Zealand.
