Residence	Italy	Address	Christchurch				
Line Breeding	VA2 Quenn vom Loher Weg SchH3 FH 4,4-3		Barv von Haus Yu SchH3 5-5				

A. FINDINGS ON THE DAY OF THE SURVEY (GENERAL DESCRIPTION OF THE APPEARANCE AND CONSTITUTION, SIZE)

Black & Gold (63.5cm) above medium size, firm & dry, a young male who attracts because of his particularly typical presence, masculine and very expressive, medium eye, very good length of neck, high withers, firm straight back, good lay of croup that could be a fraction longer, very good fore and hindquarter with well-muscled thighs. Very good length of foreleg, good fore and underchest, stands correct, steps correct coming and going, he displays a very far reaching ground covering gait, demonstrated with much strength and dynamism with a very good balance and presentation and maintaining very good high wither height during all aspects. Stands firm to the gun and is self-assured.

B. PARTICULAR VIRTUES & FAULTS (IN ADDITION TO FINDINGS IN A)

He impresses because of his very good general firmness, his very good sequence of steps, he is very well proportioned, maintains a very good centre of balance, he is well knit overall, well pigmented and demonstrates an inherent desire to perform, however his croup line could be a little more correct. He has absolutely ideal forequarter proportions. Has a very good hip and elbow status.

C. ADVICE FOR THE SELECTION OF A BREEDING PARTNER (RECOMMENDATIONS & WARNINGS)

His sire Ulk v Maikhus was VA7 in Italy in 2015 and VA3 in 2016. His progeny are typey, medium strong and well coloured. Full carries a strong productive line to Furbo degli Achel as does his dams line to Paer v Hasenborn. He is linebred to VA2 Quenn v Leherweg 4,4-3 and should offer a good predictability within these lines. Positive aspects towards his breeding program should offer very good overall firmness and type, very good proportions and overall movement plus character and the potential advantage to help with height. In a choice of breeding partner, they should have good croups and forequarter angulation. This young male should help stamp his willingness to perform and in vitality. Very highly recommended for breeding.

D. GENERAL INFORMATION QUALIFYING CRITERIA

1 (a) Height at Withers	63.5 cm	(b) Depth of Chest	28.5 cm
(c) Chest Circumference	81 cm	(d) Weight	34 kg
2 COAT			
(a) Type	Normal	(b) Condition	Healthy
3 COLOUR & PIGMENT			
(a) Colour & Markings	Black & Gold, shaded mask, dark saddle	(b) Pigmentation	Strong
