A. FINDINGS ON THE DAY OF THE SURVEY (GENERAL DESCRIPTION OF THE APPEARANCE AND CONSTITUTION, SIZE)

Large (65cm) Black & Gold, strongly masculine dog, full of type with very good expression, well defined strong masculine head. He is well pigmented with high withers, firm straight back, good croup, with very good fore and hindquarter angulations, broad thighs, very good fore and underchest, stands straight in front, steps correct, correct coming he exhibits a very productive length of stride, powerful movement, powerful drive, far reaching ground covering movement with correct sequence of steps via a firm back. Calm self-assured and stands firm to the gun. **UK Very expressive, over medium size male of medium strength, very good proportions, good pigmentation, very good fore & aft angulation, very sound & good movement, excellent temperament.**

B. PARTICULAR VIRTUES & FAULTS (IN ADDITION TO FINDINGS IN A)

He is very typical and expressive, strong & substantial, very correct overall anatomical structure, strongly boned with correct structural proportions, firm and dry and overall well-knit.

C. ADVICE FOR THE SELECTION OF A BREEDING PARTNER (RECOMMENDATIONS & WARNINGS)

He exhibits a very good embodiment of his lineage and is recognisably true to his sire in type. Both his brother and dam were highly classified at the German Seiger show and his father was German Seiger in 2017. We can expect that he can contribute to the improvement of overall strength, substantiation, type and overall movement. His dam lines are strong in depth and he carries direct lines to Remo vom Fichtenschlag and Zamp vom Thermodos which is very advantageous. His breed survey classification Class I in the UK still remains in place. Partners should be of medium to above medium in size with very good croup lines. He is very highly recommended for breeding.
